Murcia, Spain • linkedin.com/in/fjaviermm • fjaviermm.dev@gmail.com • fjaviermmdev.github.io

Computer engineer with experience in Python backend development, REST APIs, automated testing and deployments with Docker and AWS. Currently a Software Engineering Analyst I at Lynx Tech.

Professional Experience

Lynx Tech — Madrid, Spain (remote)

Software Engineering Analyst I — November 2025 - present

- Develop and maintain multiple REST APIs and proprietary Python packages for anti-money laundering (AML) software.
- Implement features, identify and fix bugs in APIs and packages, and write functional and automated tests with Pytest.
- Deploy APIs to Amazon ECS, develop and maintain AWS Lambda functions, and build integrations that read and write data in Amazon S3.
- Develop OpenSearch dashboards using data stored by the APIs.

Odin Solutions — Murcia, Spain

Junior Researcher — July 2024 - November 2025

- Developed and maintained APIs and services in Python, Java and Go, deployed on Docker/Kubernetes, for R&D projects including MASTERPIECE, UniMaaS and MAS4Care.
- Managed Git repositories, Jenkins pipelines in Groovy and Bash scripts; administered authentication with Keycloak.
- Administered Overleaf, DokuWiki and ChartMuseum, including updates, monitoring and incident resolution.

Development and research · Bachelor's thesis — November 2023 - July 2024

- Developed a Python LoRaWAN agent to integrate devices with FIWARE: **approximately 46% lower average resource consumption** than the average of the open-source agents compared.
- Extended the ingestion service and query API to support InfluxDB.

Development and research · Internships — Feb. - Apr. and Jun. - Aug. 2023

- Implemented a Policy Administration Point (PAP) from scratch using Python, Flask and XACML, deployed in Docker.
- Developed an Orion-LD notification ingestion service with Elasticsearch and an NGSI-LD/NGSIv2 query API.

Education

Master's Degree in Cybersecurity — 2025 - present

University of Murcia · Expected completion in 2027.

Bachelor's Degree in Computer Engineering — 2020 - 2024

University of Murcia · Specialisation in Information Technologies.

Matrícula de Honor (highest course distinction) in Distributed Systems.

Technical Skills and Languages

Backend: Python (Flask, FastAPI, Django, SQLAlchemy, Pytest), REST APIs, OpenAPI, Java and Go.

Cloud and CI/CD: AWS (ECS, Lambda, S3), Docker, Kubernetes, Git, GitHub Actions, Jenkins and Bash.

Data: PostgreSQL, MySQL, MongoDB, Elasticsearch, OpenSearch and InfluxDB.

Languages: native Spanish and English B2 (Cambridge).
